Chapter 1

Chapter Name

Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language. [SK99]

1.1 Section Name

UIMA (Unstructured Information Management Applications (UIMA))
ist toll! DKPro ist wundervoll! [SK99]

Glossary

DKPro

DKPro is a community of projects focussing on re-usable Natural Language Processing software 14

Unstructured Information Management Applications (UIMA)

UIMA are software systems that analyze large volumes of unstructured information in order to discover knowledge that is relevant to an end user. An example UIM application might ingest plain text and identify entities, such as persons, places, organizations; or relations, such as works-for or located-at. 14
